B. E. Semester: 3 Mechanical Engineering Subject Name: MATERIAL SCIENCE & METALLURGY (ME-304)

A. Course Objective:

- To present a problem oriented in depth knowledge of MATERIAL SCIENCE & METALLURGY
- To address the underlying concepts and methods behind MATERIAL SCIENCE & METALLURGY

B. Teaching / Examination Scheme

| SUBJECT | | Teaching Scheme | | | | Total | Evaluation Scheme | | | | Total | |
|-----------|-------------------------------------|-----------------|-----|-----|-------|--------|-------------------|-------|-------|-------|---------------|-------|
| CODE NAME | | - | Т | Р | Total | Credit | THEORY | | IE | CIA | PR. / VIVO | Marks |
| CODE | NAIVIE | Hrs | Hrs | Hrs | Hrs | | Hrs | Marks | Marks | Marks | Marks | |
| ME304 | MATERIAL SCIENCE & METALLURGY | 4 | 0 | 2 | 6 | 5 | 3 | 70 | 30 | 20 | 30 | 150 |

C. Detailed Syllabus

- 1. Introduction to Material Science and Metallurgy: Classification of Engineering Materials, Engineering requirements of materials, Properties of engineering materials, Criteria for selection of materials for engineering applications.
- 2. Metallic Materials: Types, properties and applications, Structure of Metals, Fracture, Macro-examination, Spark Test, Sculptures Print, Macro-etching, Microscopic examinations, Magnetic Testing, Chemical analysis of steel and iron for Carbon, Sulphur & Phosphorous.

3. Iron-Carbon diagram, plain carbon steels, Allotropy of iron.

- 4. Crystallization of metals, Solidification of an alloy, solid solution types. Thermal Equilibrium diagrams of binary alloys. Effects of Structure on Physical Properties.
- 5. Cast Iron: Grades, Alloy Cast Iron, Malleable Iron, S. G. Iron.
- 6. Wrought Iron: Properties and uses.
- 7. Steel: Classification of Steels, Properties and uses, Effects of alloying metals.
- 8. Heat Treatment of Steels: Study of Heat-Treatment processes such as Normalizing, Annealing, spheroidizing, hardening, tempering, austempering, martempering, case-hardening, nitriding, cyaniding, induction hardening, flame-hardening, ageing. Application of above processes in mechanical components such as gears, bearing, turbine blades, crankshafts, pistons, cutting tool materials also.
- 9. Non-ferrous alloys: alloys of copper, aluminium, magnesium titanium. Other alloys of lead, tin, zinc, nickel, manganese, white metals and bearing alloys.
- 10. Powder Metallurgy: Application and advantages, Production of powder, Compacting, Sintering, Equipment and process capability.
- 11. Corrosion of metals: meaning, causes and nature. Measures of counteracting corrosion, Metal coatings, Organic coatings, Lining and cladding, Use of Corrosion inhibitors, Cathodic protection against corrosion.
- 12. Non-destructive testing such as Radiography Testing, Dye Penetration Testing, Magnetic Particle Testing, Ultrasonic Testing, and Jominy endquench test.

D. Lesson Planning

| Sr.No. | Date/Week | Unit No. | % Weightage | Topic No: |
|--------|--|----------|-------------|-----------|
| 1 | 1 st ,2 ^{ed} ,3 ^{ed} | Unit 1 | 20 % . | 1,2 |
| 2 | 4 th ,5 th ,6 th | Unit 2 | 20 % | 3,4,5 |
| 3 | 7 th ,8 th ,9 th | Unit 3 | 20 % | 6,7,8 |
| 4 | 19 th ,11 th ,12 th | Unit 4 | 20 % | 9,10 |
| 5 | 13 th ,14 th ,15 th | Unit 5 | 20 % | 11,12 |

E. Instructional Method & Pedagogy

- 1. At the start of course, the course delivery pattern, prerequisite of the subject will be discussed
- 2. Lecture may be conducted with the aid of multi-media projector, black board, OHP etc. & equal weightage should be given to all topics while teaching and conduction of all examinations.
- 3. Attendance is compulsory in lectures and laboratory, which may carries five marks in overall evaluation.
- **4.** One/Two internal exams may be conducted and total/average/best of the same may be converted to equivalent of 30 marks as a part of internal theory evaluation.
- 5. Assignment based on course content will be given to the student for each unit/topic and will be evaluated at regular interval. It may carry an importance of ten marks in the overall internal evaluation.
- 6. Surprise tests/Quizzes/Seminar/Tutorial may be conducted and having share of five marks in the overall internal evaluation.
- 7. The course includes a laboratory, where students have an opportunity to build an appreciation for the concept being taught in lectures. Suggested list of experiments are as given below.

WAVIDYALAKA

- 1. Classification of materials
- 2. Study of a heat treatment furnace and a thermocouple pyrometer.
- 3. Heat treatment of plain carbon steel.
- 4. Study of metallurgical microscope and specimen polishing machine.
- 5. Micro structural examination of heat treated steel specimens.
- 6. Microstructure examination of metals and alloys
- 7. To examine the microstructure of prepared specimens.
- F. Students Learning Outcomes
- The student can identify different areas of MATERIAL SCIENCE & METALLURGY.
- Can find the applications of all the areas in day to day life.
- G. <u>Recommended Study Materials</u>
- Reference Books:
- 1. Engineering Metallurgy and material science by S. P. Nayak.
- 2. Materials and Metallurgy by G. B. S. Narang and K. Manchanedy
- 3. Elements of Metallurgy by Dr. Swaroop and Dr. Saxena.
- 4. Material science and manufacturing processs by Dharmendrakumar and S. K. Jain.
- 5. Physical Metallurgy by Robert Read
- 6. Metallurgy for engineers by V. Raghvan
- 7. Metallurgy for engineers by Bava.
- 8. Physical metallurgy by Rollason.
- 9. Physical metallurgy by Hyegins.
- 10. Tool steel by Rabert.
- 11. Material Science by Annver.
- 12. Material Science by O.P. Khanna.
